Note:

1. Those with similar toxicological properties in this table are classified as the same regulatory number; substances with different serial numbers under the same regulatory number are counted as different types of toxic chemical substances.

2. This form is based on the Chinese name. The English name, Chemical Formula and CAS number are for reference only.

3. control concentration standard:

Example 1: "Benzene" refers to those containing more than 70% (including 70%) w/w of benzene.

Example 2: "Sodium cyanide" means those containing more than 1% (including 1%) w/w of cyanide ions.

Example 3: "PCBs" means those containing 0.1 % (1,000 ppm) or more (including 0.1 %) w/w of PCBs.

4. Graded handling quantity:

The plating solution in the plating tank, the surface treatment solution in the metal surface treatment tank and the perchlorethylene in the dry cleaning machine are not included in the classification operation volume.

Example 1: Containing more than 1% of hexavalent chromium (including 1%) w/w The total operating amount of chromium trioxide (excluding the plating solution in the plating tank) is less than 500 kg (excluding 500 kg), the operating amount is less than . Graded workload.

Example 2: If the total amount of w/w sodium cyanide (excluding the plating solution in the plating tank) is less than 500 kg (excluding 500 kg), the amount of operation is lower than the classification workload.

5. Toxicity Classify:

"1" represents the first type of toxic chemical substances, "2" represents the second type of toxic chemical substances, "3" represents the third type of toxic chemical substances, and "4" represents the fourth type of toxic chemical substances.

6. For testing, research and educational purposes only.

7. The controlled concentration of asbestos is those with fibrous, filamentous or fluffy asbestos content of more than 1% (including 1%) W/W.

8. For toluene diisocyanate under constant temperature process below 25 degrees Celsius (the control concentration is calculated based on 2,4-toluene diisocyanate), the quantity below 5 metric tons shall be counted as the usage amount.

2.1.15 TSCA announces that five PBTs contained in raw materials and finished products are prohibited from being imported into the United States.

The US Environmental Protection Agency this time not only prohibits raw materials, but also includes "finished products" containing these substances. The details of the control scope of these 5 PBTs and the individual effective time are as follows.

The complete content is mainly based on the official website of USEPA.
